

"All Set" for Polling on Thursday Morning Heavy Vote is Anticipated in Pass Towns Keen Fight Between G. Cruickshank and J. Stobbs for Rocky Mountain Constituency. Speculation Rife on Result

Labor Forces Held Rally on Sunday Evening for Stobbs --Address by Fred White

Scores Communists for Disloyalty to Organized Labor and Urged Solid Support to Canadian Labor Party Candidate and Recognized Labor Leaders

The Labor candidate, Jos. Stobbs, and Fred J. White, M.L.A., addressed the electors on Sunday evening in the K. of P. hall, Wm. Lees acting as chairman.

Mr. Stobbs briefly reviewed his record in the ranks of the Labor movement, and stated that despite what is being said of the system under which we live, we must find other ways of improving it than by tearing it down. He had always stood for a united front, and was sorry to see that opposing factions in the Labor movement were advocating trying to tear it apart. If he did not believe in the platform of an organization, then he would resign from it and take no part in its activities.

Speaking of some of the proposals urged by those opposing his candidature, he asked how could two weeks with pay be arranged in the coal industry under existing conditions, when there has not been six months work in a year for those engaged in it? The coal industry today cannot furnish employment for those who desired to work, and many miners who had some experience in farming would be pleased if they had the opportunity to go onto a farm.

Fred J. White, M.L.A., brought fraternal greetings of Calgary labor organizations to Coleman, and stated that organized labor would watch keenly the result in Rocky Mountain constituency. He hoped that Labor representation would be maintained, and reminded the audience that Thursday next is the anniversary of the disaster which took place at Hillcrest 16 years ago. "Are you willing to take up the torch thrown to you in order to maintain the protection so rightly deserved?" he asked, "and what will 1930 bring?" He stated that in 1926 there were six Labor representatives in the house. He hoped all Labor candidates would be returned.

His remarks of those opposed to Labor were based on principle, not on personalities. In order to bring about improvement, there must be unity. When men appeared as candidates then their records and the records of those with whom they associate must be reviewed, to find what they have contributed towards the welfare of the people whom they desire to represent. What has been the association or affiliations of opposing candidates; have they been concerned in the social welfare of Labor, which must necessarily be their first consideration if they wish to represent the laboring class?

No man can be independent, and the test would come when he appeared on the floor of the Legislature. He then must associate himself with a group. As a Labor candidate he had a right to come to the constituents and question the records of others on labor legislation.

He challenged anyone to state that the Labor party had not made the cause uppermost in the Legislature. Rather should those who have opposed the Canadian Labor Party give their assistance to Labor's representatives on the floor of the house, and those who were trying to dis-unite the Labor forces were not loyal to their fellow-members.

At the close of his address questions were asked by John O'Sullivan

on Mr. White's attitude towards unemployment in Calgary, and others of the Communist party present asked questions on various matters from nurses working 12 hours a day to the bi-monthly payment of wages in the coal camps. Before the chairman declared the meeting closed the Communists left the hall.

Here and There

(538)
Taking turns while the engine was under a full head of steam, Engineer H. J. Storey and Fireman A. Fulkerson, dumped the fire and entered the fire box of the engine to make running and repairs of grates displaced from the grate carrier on Canadian Pacific engine 676 at Kilo, B.C., recently. They could stand the intense heat only a few minutes at a time, but they succeeded in their work and saved serious delay, bringing their train to destination within a few minutes of scheduled time. They were each awarded 10 merit marks, the railway's recognition of conspicuous merit.

Forty-three years ago May 24 last, the first transcontinental passenger train reached Vancouver over the Canadian Pacific Railway, leaving again next day. That was eleven months after the arrival of the first through passenger train at Port Moody, original terminus of the transcontinental line.

"Judging from present indications, there is every reason to believe that the tourist traffic from the United States and from other Canadian provinces to the Maritimes will reach record proportions," newly appointed vice-president in charge of traffic. They are: C. E. Jefferson, assistant general freight agent, Montreal; H. W. Gillis, assistant freight traffic manager, Winnipeg; and Gerald Hiam, assistant general freight agent, Montreal, to be assistant freight traffic manager, eastern lines. The appointments were effective from June 1.

Three important appointments to the freight traffic department of the Canadian Pacific Railway have been announced by George Steggen, newly appointed vice-president in charge of traffic. They are: C. E. Jefferson, assistant general freight agent, Montreal; H. W. Gillis, assistant freight traffic manager, Winnipeg; and Gerald Hiam, assistant general freight agent, Montreal, to be assistant freight traffic manager, eastern lines. The appointments were effective from June 1.

A ten day "all expense" tour of eastern Canada, covering 2300 miles, and including a visit to the Toronto Exhibition, world's greatest annual fair, will be conducted from the Maritimes by Professor H. L. Stewart, of Dalhousie University, next August. The tour which will take in most of the points and cities of interest in the territory will be over the lines of the Canadian Pacific, Dominion Atlantic and Quebec Central Railways and by Canada Steamships Line.

Six of the Canadian provinces, Nova Scotia, New Brunswick, Quebec, Manitoba, Alberta and British Columbia, have taken advantage of the Farm Loan Act of Canada, a Dominion Government measure under which long term mortgage credit is extended to Canadian farmers. At the end of last March loans to the total amount of \$4,557,000 had been approved.

Miss Peggy Fairfull has returned from Garbutt's business college, Calgary, after completing her course,

Cruickshank, George Edward.

Mark Your Ballot for the Independent Candidate

WHERE TO VOTE!

Polling places for tomorrow's election are as follows:

Carbondale, at McGillivray general office, deputy returning officer, Walter Nelson.

West Coleman, at Walter Bobbitt's store, W. Chapman, deputy returning officer.

Centre Coleman, which includes from the eastern side of Eastern avenue to the west side of Mayfair avenue, at the United Church hall, W. J. Whyte, deputy returning officer.

East Coleman, from east side of Mayfair avenue to Sec. 10, Twp. 8, R. 4, two polling booths in K. of P. hall, W. H. Haysom and Harold Chamberlain, deputy returning officers.

The polling hours are from 9 to 6.

Local News

Mr. Morrison of Drumheller, a former resident of Coleman, has been visiting friends here this week.

Mr. and Mrs. J. D. McLeod left last week for their old home in Cape Breton, N.S., to spend the summer.

Miss Adele Whiteside won the riding and jumping competitions (senior) in the annual sports at St. Margaret's College, Victoria, B.C., in which there was a large number of competitors.

It is reported that the Palace theatre will shortly re-open, which will be welcome news to local theatre-goers. Many have been attending the shows at Blairmore and Bellevue during the time the Palace has been closed.

Over 2000 sheep have been turned out to graze in the vicinity of Crow's Nest mountain, having been shipped in from the Lethbridge experimental farm. At Lethbridge over 2000 head have been shipped in from Lethbridge private owners, and will remain there till late in September.

Communists Say Smash "System" by Revolution and Commence Class War

John O'Sullivan Says Only Remedy for Workers is to Down Capitalists and Labor Party and Organize Under Communist Banner

John O'Sullivan has made a determined effort to capture the seat for the Communist party. He believes sending what has been said at a public meeting has been hurled at the Communist party. The recognized labor leaders try to improve "the system" by practical methods. The Communist boldly urges "bloody revolution," but the masses fail to "revolute."

On the eve of election day, there is naturally speculation as to the chances of the three candidates. The campaign locally has not produced anything startling. No promises have been made by candidates, there has been a lot of bally-hoo by the Communist forces, but the great body of the public has not been informed how "the system" is to be improved.

The trouble is that some over-zealous people do not sufficiently appreciate the privilege of free speech to consider their utterances before broadcasting them. When they find they have been misdirected, then it is the easiest thing in the world to blame the press.

ENO'S FRUIT SALT

An Encouragement To Progress

The subject of immigration has for many years been a live topic in Canada, and never more so than during the past year or two. There is, however, this difference, that whereas for many decades the discussion of the subject was largely as to ways and means whereby a large volume of immigration could be secured, in more recent years the thought of our people has rather been directed towards the successful colonization of the new comers.

That is to say, where at one time the main objective was to get immigrants to settle upon our vacant lands, the main objective now is to see that those who do come make a real success of their venture, adapt themselves to the new environment in which they find themselves, and, by associating themselves with the life and activities of the communities in which they locate, identify themselves with Canada and become Canadian citizens in thought and aspiration as well as in name.

To a greater extent than ever before native-born Canadians, and those of our citizenship who call the British Isles "home," have come to realize and appreciate the fact that immigrants coming to Canada from lands other than those under the British flag or speaking the English language are, really, even keenly, anxious to become Canadians in the full meaning of the term. Appreciation of this fact is helping to break down old barriers of prejudice, and the English-speaking Canadian is becoming more and more anxious to co-operate with and assist his fellow-Canadian or foreign extraction.

In a recent issue of this paper there appeared an article in the news columns outlining a plan originated by the Canadian National Railways, under the direction of Dr. W. J. Black, the directing head of the departments of Agriculture and Colonization of that system, having as its object the encouragement of community progress and development, and the attainment of the fullest possible measure of Canadian citizenship by those rural communities of the three prairie provinces which are of European origin.

The plan is simple, but far-reaching and of tremendous importance. It involves the carrying out of a series of competitions among such communities, to be held annually for a period of five years, with three substantial prizes, of \$1,000, \$500, and \$250 respectively, to be awarded each year in each of the Provinces of Manitoba, Saskatchewan and Alberta on the understanding that the money be utilized in community work of some progressive nature.

In other words, such of these rural municipalities or groups of school districts within municipalities in which the population is made up of people of continental European origin of the first or second generation, which display the greatest interest in co-operation among themselves to promote education, public health, and a better class of agriculture, and show the best results, will be awarded these prizes, which, in turn, are to be used in still further promoting progress in community betterment.

The community which through the co-operative action of its people achieves the best school, the most regular attendance at public schools, the largest percentage of children going on for secondary or university training, which takes the keenest interest in matters of public health, social welfare, music, arts and handicrafts, which enthusiastically supports community organizations such as agricultural societies, co-operative marketing pools, women's institutes and home maker's clubs, libraries, etc., or which evinces the greatest interest and reveals the greatest progress in the improvement of agricultural methods, will be the winners of these substantial prizes.

But the greatest gain to such communities will not be the winning of the prizes, but in the direct and indirect benefits which will accrue to each individual and the community as a whole from the practice of these worthwhile things. The prizes are, after all, but an additional incentive to work for the welfare and advancement of the community which the people therein call "home." The prizes are but a tangible encouragement to excel all other communities in real constructive Canadian citizenship, to demonstrate through a determination to make use of and emphasize the best Canada has to offer in the development of their particular section of the Dominion.

Death Takes Well**Known Railway Official**

F. E. Trautman Was C.P.R. Publicity Representative For Many Years

Fred E. Trautman, 66, for almost a score of years publicity representative of the Canadian Pacific Railway in the west, died in Winnipeg recently. He had been operated on as a result of a blood poisoning condition and failed to rally.

Mr. Trautman, born in Pennsylvania, worked on newspapers in the eastern United States and at Fort William, Ont., before he came to Winnipeg in 1912 as Canadian Pacific Railway publicity man. In taking the position with the railway under Sir George Bury, he was the first railway press representative in the west.

His territory, through which he

operated since his appointment, extended from Winnipeg to the Pacific coast and included a portion of the western United States.

Three Delegates From Canada**To Attend Important Celebration In Iceland During July**

Premier Mackenzie King stated in the House of Commons that it was thought advisable to have three delegates attend from Canada at the one-thousandth anniversary of the founding of parliament of Iceland. The event was very important in the history of parliamentary institutions and the government had in mind the presence of citizens to something of a permanent nature which would be a memorial of the occasion.

New Use For Diamonds

That precious stone, the white diamond, has left its exclusively jewel-like job and put on overalls. A leading optical company has discovered that the jewel, properly mounted, is the best possible cutting tool for finishing small metal parts, cutting literally thousands of pieces with no change in its cutting edge. Aristocracy, whether of gems or of men, justifies its exalted best by giving the most service.

Many good roads are being constructed in Panama.

Ocean Bed is Changing**Shipping Has Been Endangered By Upheavals In Pacific**

Strange things are happening in the murky regions of the ocean bed. In the Pacific the bed has been rising so much that shipping has become endangered. Of the west coast of Nicaragua the charts show an ocean depth of 222 feet, but the figure is now actually 2 feet. Another sounding showed the actual depth to be 51 feet where the chart showed 1,160 feet. Sudden upheavals on the ocean floor recently worked havoc among the telegraph cables; many of the stoutest were snapped like string, including one of the latest, which normally takes five different sets of messages at once in each direction. When a break occurs the cable ship goes out; delicate apparatus aboard shows the break within two yards of the actual spot, and dragging commences. Up comes the cable. A new length is inserted to make the join, and so critical is the actual work of joining the strands inside that the film of grease on a man's hand can actually prevent the join from being effective.

BRIGHT EYES ROSY CHEEKS**The Birthright Of Every Girl**

Dull eyes mean misery and weakness—a sure sign of a bloodless condition. Anemic girls and women have dull, heavy eyes with dark lines underneath. The bright eyed girl or woman is always happy and well.

There is one way to make the eyes bright—to bring the glow of health to pale cheeks—that is to invigorate the body with new blood—rich, red health-giving blood. Dr. Williams' Pink Pills do this and they do it well. Concerning them Mrs. Robert Devitt, Brougham, Ont., says: "My daughter became so ill and nervous we had to take her out of school. She was pale and thin; her eyes were dull, and she had a look of death. I began giving her Dr. Williams' Pink Pills and in less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Predicts Reduction**In European Crop****One Third Less Than Last Year Say**

Wheat Experts
A European wheat harvest of about one-third less than the bumper crop of 1929 is predicted by London, England, wheat experts.

The 1930 harvest, which the experts estimated at about 25 per cent. less than average, was damaged somewhat by a cold, wet spring. The decrease in acreage was cited to account for the remainder of the drop from last year's total.

In the event of a shortage in the current crop in the United States, Argentina and Canada, it was considered certain that prices would be advanced materially.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Extirminator.

No Mortar Used

Bricks that dovetail and interlock and that are said to form a wall stronger than can be built with the usual kind, are laid without mortar. An angular ridge in the centre of each brick fits into a corresponding groove in the one above it, so that no mortar is necessary to hold the units together, says Popular Mechanics Magazine.

Bicycles Are Cheaper

More bicycles were made in Canada in 1929 than in any previous year and prices were lower than they have been for thirty years, according to the records of the Canada Cycle and Motor Company.

NERVES WERE BAD**Could Not Sleep****Tired All Day Long**

Canada's War Pensions**Liberality Shown By Act Recently Passed By Parliament**

The recent War Pensions Act passed by the House of Commons and the Senate keeps the Dominion of Canada in the forefront among nations of the world as to liberality in dealing with war veterans. So far, Canada has paid in pensions and soldiers' rehabilitation \$625,900,000. Soldier's insurance, given without medical examination, is at present self-supporting, but before the conclusion of the scheme the loss is estimated will be over \$25,000,000.

This year's expenses for pensions and soldiers' civil re-establishment is estimated at \$61,304,000. Next year this branch is expected to cost \$2,000,000. The new scheme giving the equivalent of old age pensions at an earlier age to "burnt out soldiers" will cost \$2,000,000 this year and increase annually to 1937, when it will be \$18,000,000. It will expire in 1975, and the aggregate cost will be \$480,000,000.

An immediate outlay of \$7,457,000 will be involved in replacing those on the pension list who commuted their pensions. There are 8,048 in this class. The law is made broader in the new pensions and medical examination and this will also add to the annual cost.

New Telegraph System**Office-To-Office Connection Would Keep Messages Secret**

A new system of telegraphy for London has been suggested by which messages tapped out on a keyboard, like a typewriter keyboard, in a private office, will be transmitted and automatically reprinted in the office of another subscriber. If the new system is installed a subscriber wishing to telegraph by it presses a button to call the exchange, and dial the number of the subscriber to whom he wishes to telegraph, in the same way as an automatic telephone is dialled. When the exchange signals that the connection has been made, both subscribers can typewrite to each other. Their messages will be telegraphed and re-typed automatically. When the communications are finished another button is pressed which ends the connection. The introduction of the system will offer the advantages of quick transmission, the ability to send messages at any time, and complete secrecy, as the direct office-to-office connection will prevent the message being seen by telegraph clerks or other post office employees.

Plans Elevated Playgrounds**New York Architect Has Idea For Congested Areas**

Elevated playgrounds for children over the streets in the congested areas have been proposed by a New York architect. Such playgrounds, it is estimated, could be constructed for about \$25,000 each, only a fraction of the cost of acquiring property for them, and at the same time providing the facilities where most needed, instead of in isolated sections difficult for the children to reach. The grounds would be built of reinforced concrete with a steel superstructure and surrounded by a wire net with flower boxes outside the netting to give the effect of a roof garden.

Its Quality Sells It—The fact that

so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Praise For Canada

Of all countries in the world, Canada is the best place to live in at the present time, declared Lord Willingdon, Governor-General, in a recent speech at Ottawa. No country had a brighter future than Canada. His Excellency said, and in a very few years the Dominion would go forward to increased prosperity. In his recent visits he had been struck by the evidence of more satisfactory farming conditions than he had witnessed since coming to Canada.

Barber's Itch and Ringworm are

relieved by the use of Douglas' Egyptian Liniment; quick, certain results. Relieves the most obstinate cases.

Bomb Found Near Vereg's Tomb

An attempt to blow up the tomb of Peter Vereg, the Doukhobor leader, who was killed in an explosion in a railway coach in 1924, was revealed at Nelson, B.C., by the finding of a bomb planted beside the structure. A misadventure in the timer failed to explode the dynamite.

Saxony now has 1,543 singing societies with 56,198 members.

Use Minard's for Rheumatism.

Preparing Valuable Report**Dr. Weir Making Survey Of Conditions Regarding Nursing Profession**

Dr. G. M. Weir, D.Phed., head of the school of education and director of the summer session, University of British Columbia, who is making an all-Canada survey of conditions regarding the nursing profession, has been loaned by the B.C. officials to the Canadian Medical Society and the Canadian Nurses' Association with a view to preparing a report on the educational, economic and sociological problems of the nursing profession. His head office is in Toronto.

Recipes For This Week

(By Betty Barclay)

JELLIED VEGETABLE RELISH

- 1 package lemon flavored gelatin.
- 1 cup boiling water.
- ¼ cup strained tomato juice.
- 3 tablespoons vinegar.
- 1 teaspoon salt.
- ¼ teaspoon pepper.
- 2 cups mixed cooked vegetables, finely cut.

Dissolve gelatin in boiling water. Add tomato juice, vinegar and seasoning. Chill. When slightly thickened, fold in vegetables. (A mixture of several of the following may be used: Celery, green peas, green or yellow pod beans, asparagus tips, onions or carrots.) Turn into small individual molds. Chill until firm. Unmold and serve with meat course. Serves 8.

SPECIAL DEVIL'S FOOD CAKE

- ½ cup shortening.
- 2 cups sugar.
- 4 eggs.
- 1 cup milk.
- 2½ cups flour.
- 3 teaspoons baking powder.
- 3 squares chocolate.
- 1 teaspoon vanilla.

Cream shortening and sugar together. Add egg yolks well-beaten. Sift together dry ingredients and add alternately with the milk. Add melted chocolate and vanilla. Lastly, fold in well-beaten egg whites. Pour into 2 well-greased square cake tins and bake in moderate not too hot oven (375 degrees Fahrenheit) for 30 minutes. Use your favorite icing.

Roads Made Of Steel

Roads of steel in England are scheduled for the future. If one such road built on the King's Road, Chelsea, proves practical, it is a continuous network of tough steel, whose interstices are filled with concrete. On the surface, however, the metal grid is directly exposed to the wheels of vehicles. It is expected to last twice as long as any other road.

Minard's for Insect Bites.**Revenue From Livestock**

Indiana from the livestock provinces sold approximately \$250,000 worth of cattle last year and still have around 25,000 head on the different reservations. The quality of the cattle is improving rapidly and Indian live stock men are in good financial condition.

WRIGLEY'S

Life—like good golf—is made up of many little things each one of which helps the score. Better digestion—readier nerves—clearer brain, are all factors that count and are gained from the use of Wrigley's.

**Aid For Faithful Servant****Man Who Travelled With David Livingstone Gets Pension**

As the result of an appeal for funds to aid Matthew Wellington, the faithful servant of David Livingstone, the explorer-missionary, he is assured of an income of \$5 a week for life. Wellington is 85 and lives at Mombasa, Africa, so that the pension will care for his simple needs. Matthew was with his master at his death, helped to embalm the body, and accompanied the coffin from the wilds to the African coast. The response to the appeal from Scotland was gratifying, and the money is now being sent to the old man through the Resident Commissioner of Mombasa.

Nothing As Good For Asthma. Asthma remedies come and go but every year the sales of the original Dr. J. D. Kellogg's Asthma Remedy grow greater and greater. No further evidence could be asked of its remarkable merit. It relieves. It is always of the same unvarying quality which the sufferer from asthma learns to know. Do not suffer another attack, but get this splendid remedy today.

Treaty Money Paid

Five dollars apiece in treaty money was handed out to 481 Indians on June 5, at The Pas, Manitoba, as the Union Jack fluttered over the treaty ceremony. Two Indians went for a taxi-drive and scores frequented the five-and-ten-cent store. The natives made merry at the reserve, singing Indian songs and dancing the Red River jig.

Old Press Moved

The Nogales International's 53-year-old newspaper press has left Arizona. It has been moved across the International line to Nogales, Sonora, having been sold to Judge Francisco Battiz of that city.

LARGER VOLUME OF IMMIGRATION FROM BRITAIN

London, England.—Despite a decrease in the volume of British emigration to other parts of the Empire in 1929 as compared with 1928, emigration to Canada showed a substantial increase, according to the report of the overseas settlement committee, made public today. The report is confined to a statement of events in 1929 and it is presumed the general policy of the Empire governments with regard to overseas settlement will be discussed at the Imperial Conference in October.

During 1929 the total number of emigrants from Great Britain and Northern Ireland to non-European countries was 143,686, compared with 136,834 in the preceding year. Notwithstanding this increase in the total migration overseas the total who went to other parts of the Empire was 106,900 in 1929. The figures for 1928 were 108,982. The number assigned to go overseas under the Empire Settlement Act increased from 47,855 in 1928 to 72,213 in 1929.

The substantial increase in the movement to Canada was due to the ten pound rate, the report states. The total movement to Canada was 65,556, compared with 46,709 in 1928. There was a decrease in the movement to Australia.

The report describes the scheme for settling 5,000 families on farms in Canada, which started in 1924, and is now completed, as the most successful large scale enterprise yet undertaken under the Empire Settlement Act.

New Order For Stockyards

May Be Permitted To Do Business In Restricted Areas

Ottawa, Ont.—Public stockyards were excluded from the restricted areas placed on a designated area while testing for bovine tuberculosis is conducted, by an order-in-council passed by the Federal Government. It will mean that the Minister of Agriculture may issue an order that a public stockyard in a restricted area may be permitted to carry on its business just as if the area had not been established.

Saskatoon is the only place in Canada affected at the present time, officials of the Department of Agriculture said. While no order had been passed affecting the stock yards in that city, one is expected, they said. When tests of bovine tuberculosis are being conducted in a specified area, there can be no movement of cattle except that of tested cattle. Stockyards protested that this worked an injustice on them and that it seriously affected their business. This led to the order-in-council which excludes them from the restrictive terms.

Contracts End In December

Married Women Will Not Be Employed In Winnipeg Schools

Winnipeg, Man.—Married women will not in future be employed as teachers in Winnipeg schools, it was decided at a meeting of the school board.

Married women now employed will be given notice that their contract will terminate December 31, 1930, unless exceptional circumstances prevail to warrant continued employment after that date.

It was also decided, in view of the existing unemployment situation, that the board will "record its disapproval of the acceptance by its employees of remunerative vacation employment."

Apply For Oil Leases

Prince Albert, Sask.—Saskatchewan's latest oil boom is apparently gathering momentum. The Dominion land office here has received two applications for oil leases on two sections of land in the vicinity of Kakwa, 17 miles south of Hudson Bay Junction, where oil and natural gas was struck by water well drillers recently. The applications have been forwarded to Ottawa for approval.

Plane Carried Huge Sum

Miami, Fla.—An aeroplane bearing two million dollars in cash arrived here from Jacksonville to meet, financial situation caused by the closing of the Bank of Bay Biscayne and four others. President Reib of the National association of the money would be used through other Miami banks to pay off all concerned in the closed houses.

W. N. U., 1842

Underworld Haunts

Raided By Police

Six Hundred Suspects Are Arrested

Chicago, Ill.—Nearly 600 alleged hoodlums were rounded up as a special "strong arm" police squad slashed into underworld haunts, bent on ridding Chicago "for all time" of criminals.

Stirred to drastic action for solution of the murder of Alfred ("Al") Lingie, Tribune reporter, and other gangland slughters, the squads, armed with shotguns, revolvers and tear bombs, crashed the thug hangouts with a vengeance. Patrol wagons, loaded, began arriving at police headquarters in a stream shortly after 10 p.m., and at midnight there was no sign of a let-up.

The prisoners poured in so fast that the attaches of the bureau of identification were called on for extra details were asked to assist in the work of booking.

As soon as word of the raids was circulated, a veritable swarm of attorneys, bondsmen and others interested in seeking liberation of the suspects descended on police headquarters, but their efforts came to naught, bail being refused in each instance.

Jury Acquits Oliver On Assault Charge

Son Of Ex-Premier Of B.C. Found Not Guilty

Vernon, B.C.—It took less than 20 minutes for the assize court to bring in a verdict of not guilty against Charles Oliver, son of former Premier John Oliver, charged with assaulting Dr. V. E. Latimer, in Penticton, last November 25. It was almost a foregone conclusion following the arrest of Chief Justice Morrison to the jury that Oliver would be acquitted and a murmur of satisfaction ran around the packed court room when the verdict was given.

Only four witnesses for the crown were examined and little time was lost by Hon. R. L. Maitland, K.C., chief defence counsel in cross-examination. Mr. Maitland put in no defence but immediately opened his address to the jury.

The jury retired at 3.40 p.m. and rendered their verdict at 4.00 p.m.

Legion Objects To Fiction War Books

Condemns Those Not Founded On Actual Facts

Cardiff, Wales.—War should in no circumstances be made the subject of works of fiction, was the view expressed at the annual conference of the British Legion here.

War books came in for a good deal of criticism and a resolution was adopted condemning books in which the author does not draw on actual facts and personal experiences. The elimination of war as a measure of respect for dead and maimed soldiers.

Another resolution urged the council of the Legion to take steps to counter the "insidious propaganda" contained in books which slandered the character of Great Britain and belittled the principles for which she entered the war.

Greeted By Home City

Hon. R. B. Bennett Receives Rousing Welcome In Calgary

Calgary, Alta.—Hon. R. B. Bennett is back at his western home after firing the opening gun of his election campaign at Winnipeg, followed by a second speech at Regina. The Conservative leader arrived in Calgary at a late hour, but a large crowd was on hand to greet him at the station and wish the opposition chieftain success in his campaign.

The assemblage cheered the Conservative leader time and again, and they lined up to shake him by the hand. The Calgary Highlanders, of which Mr. Bennett is honorary colonel, were on hand and rendered music of welcome.

Survey Planned For Fall

Churchill.—Surveying of the townsite of Churchill will be done by the province of Manitoba, next fall, and construction will start next summer, Hon. D. G. McKenzie, Minister of Mines and Natural Resources, stated here.

Could Not Be Prevented

Boston.—No practical measures have been suggested which could have prevented or minimized the force of the 1929 stock market panic, according to Richard Whitney, president of the New York Stock Exchange.

Settles Old Dispute

Nova Scotia Not Liable For Militia Expenses During Strike

Ottawa, Ont.—The Province of Nova Scotia is not liable to pay to his Majesty in the right of the Dominion all expenses and costs incurred by reason of the calling out of part of the active militia in aid of the civil power in Cape Breton during June, 1925. This was the majority judgment of the Supreme Court of Canada, delivered by the chief justice here, Mr. Justice Newcombe dissenting, and Mr. Justice Cannon finding that liability was "conditional."

This settles a five-year-old dispute between the Dominion and the province in which the Dominion claimed reimbursement in the sum of \$133,116.73—the cost of despatching and maintaining troops of the permanent force in Cape Breton during the coal-mine strike of 1925.

Trans-Atlantic Trip Is Postponed

R-100 Not Coming To Canada Until End Of July

Ottawa, Ont.—The R-100 will not begin her trans-Atlantic trip to Canada until after the general election on July 28. This was conveyed to the Minister of National Defence, Hon. J. L. Ralston, in a cable received here from the British Government.

The postponement of the dirigible's flight is in accordance with an agreement between Canada and Great Britain.

The start of the flight will be made during the last three days of July, the cable said.

PRINCE MAKES HIS FIRST WORLD-WIDE BROADCAST

Glasgow, Scotland.—Making his first world-wide radio broadcast, the Prince of Wales, standing on the famous Clydebank wharves on the occasion of the launching of the Canadian Pacific Railway liner "Empress of Britain," said the building of the new liner was the most important milestone in the recent history of the British mercantile marine.

The vessel, the Prince said, represented the last word in ship-building and as to appointments would be found to have no rival. The building of what the Prince described as "this wonder ship" was another sign of the sound imperial policy of the Canadian Pacific Railway.

His Royal Highness went on to say the C.P.R. had built 16 vessels in Great Britain since the war at a cost of £20,000,000 and this when ship-building in Great Britain was at a low ebb.

Winnipeg, Man.—Radio brought the voice of His Royal Highness the Prince of Wales from Great Britain to Western Canada, as clearly as though he had been speaking directly through the microphone at one of the big Canadian stations. Listeners-in-all over the Prairie Provinces heard the heir to the British throne launch the new Canadian Pacific liner "Empress of Britain," his companion speakers being Lord Abercromby, British shipping magnate; and E. W. Beatty, K.C., President of the Canadian Pacific Railway.

Reception through CRX at Fleming, Sask., and CKY, at Winnipeg, two units in the chain of 91 stations in Canada and in the United States that received the broadcast over beam wireless from England to Yamach, Quebec, was excellent, and enabled newspapers to take verbatim the report of the speeches of His Royal Highness and Mr. Beatty.

First Bride on New Ship

When the new Canadian Pacific coastal steamer "Princess Elizabeth" was being welcomed to Vancouver recently with a civic luncheon, at which city and port officials praised the company for its initiative and foresight in building up such a fine coastal fleet, Mayor H. H. Halliday, Vancouver port superintendent, promised to present the first bride who travelled on the new ship with a bouquet. So when Mrs. L. G. Goudge boarded the ship with the groom, she was duly handed a bouquet by George Fitz, secretary to his Honor, as the first honeymooner to take the Vancouver-Victoria trip on the "Elizabeth." Picture shows, left to right, Captain R. W. McMurtry, marine superintendent, B.C. Coast Steamship Service; L. Goudge and Mrs. Goudge, and Mr. Fitz.

VISITING CANADA

Mrs. Ralph Booth, wife of Captain Ralph Booth, who will pilot giant dirigible across the Atlantic to Montreal, is now staying in Toronto, Ontario.

Ships Collide In Fog

Many Lives Lost When Passenger Steamer Rams Oil Tanker

Boston, Mass.—Flaming oil, spurting from the depths of a stricken oil tanker, believed to have been the "Pinthia," of Fall River, was thought to have claimed the lives of more than 40 persons aboard that ship and the passenger liner "Fairfax," outbound from Boston, when they collided in Massachusetts Bay.

So suddenly did the tragedy occur that not a single survivor of the tanker was believed to have escaped the fog-shrouded inferno which followed the impact.

At least a score of the "Fairfax's" passengers and crew were unaccounted for while the "Pinthia" carried a crew of 60. The big passenger liner scenes of widest confusion succeeded the shock of the crash. Men and women, believing the ship doomed, hurled themselves into the sea only to perish amidst the raging oil which poured from the tanker in all directions. Others were burned in their berths by the white heat of the fire which seared the port side of the ship.

The flames which swept both craft melted their radio batteries and temporarily ended possibility of summoning aid. The tanker, afire from stem to stern, settled slowly into the water plunging from eight 20 minutes after the crash.

Ship Receives Page Of "Evening World"

Was Sent By Radio And Picked Up Intact

New York.—For the first time a newspaper has been spread out intact by waves of ether and picked up intact by a steamer at sea.

The experiment was successfully concluded when the first page of the Evening World was sent to the United States liner "America," at the moment 2,510 miles from New York. The paper was sent by the Radio Corporation of America's new photo-radio apparatus.

A mysterious cylinder, with purple ink, spun out intact the newspaper page that had appeared on the sidewalks of New York. Pictures and type were reproduced as clearly as the city, while the steamer was nearing her port of call, Plymouth, England.

Three Subs Launched

Barrow-In-Furness, Eng.—Three submarines for the British Admiralty—the "Regulus," "Regent," and "Rover"—were launched at shipyard here within the space of 34 minutes.

Successor Not Appointed

Australia Has Not Yet Chosen New Governor-General

Canberra, Australia.—In well-informed political circles it is stated Lord Somers, governor of the State of Victoria, will act as governor-general of Australia for about six months after the departure of the retiring Governor-General, Lord Stonehaven, in October.

The reason given is that Premier Scullin has asked to have the appointment of Lord Stonehaven's successor deferred in order to enable him to consult the Dominions office when he is in London attending the Imperial conference in October.

Some time ago the appointment of a native-borne Australian to the post was mooted and the name of Rt. Hon. Sir Isaac Isaacs, chief justice of Australia, was mentioned. Premier Scullin at the time said there was nothing to prevent the appointment of an Australian.

Winnipeg Lawyer Going To Norway

Will Represent Government Of Canada At Coming Celebration

Winnipeg, Man.—James C. Berg, Winnipeg barrister and a prominent worker in Norse societies for many years, received word of his appointment by Premier Mackenzie King as representative of the Dominion Government to the celebration of the nine hundredth anniversary of the introduction of Christianity into Norway, to be held at Trondhjem, Norway, in July and August.

Mr. Berg is the son of one of the earliest Norwegian settlers in western Canada. Representatives of Saskatchewan, Alberta and British Columbia governments are expected to sail with Berg, early in July.

Simple Service For Late F. E. Trautman

Many Attend Funeral Of C.P.R. Official At Fort William

Fort William, Ont.—Impressively simple obsequies were held here for the late F. E. Trautman, for the last 18 years Canadian Pacific Press representative in Western Canada.

He was buried in the city where a large part of his career as a pioneer western newspaperman was passed as editor of the Fort William Times-Journal.

The cities of Port Arthur and Fort William were officially represented as was the railway company, and a large number of private citizens also paid their last respects. Interment was made in the family plot in Mountain View cemetery.

FIRE DESTROYS GRAIN ELEVATOR AT PORT ARTHUR

Port Arthur, Ont.—Three hundred thousand dollars damage is estimated as result of the destruction by fire of the Union Terminal Elevator work-house. The building broke into flames from unexplained cause and the conflagration raged for more than ten hours before it was brought under control.

Thousands of lake-head residents, roused from their beds by the crackling of flames and the commotion caused by the action of all available fire-fighting equipment, gathered at the scene. The reflection of the flames, which swirled to 100 feet in the air, cast a red glow over the entire sea-front in the darkness.

Estimate of the damage was unofficial, as the head offices of the company are in Winnipeg, and representatives at the lake-head would hazard no figure as probable loss.

Fifty thousand bushels of grain stored in the work-house were destroyed as the flames roared through the structure, spurning efforts of firemen to place it under control. Eleven empty box cars belonging to Canadian Pacific and Canadian National Railways took fire on the siding adjoining the burning building and were completely destroyed.

Winnipeg, Man.—Officials of Union Terminal Limited, refused to estimate loss as the result of fire destruction of the company's work-house at Port Arthur. It was stated at the head office here that "absolutely no figures are available."

Only the cement tanks of the Union Terminal plant remain intact. The grain they contained may be ruined by heat. The watchman had a narrow escape, getting out in the darkness after the light went out. Heat from the burning pile was intense.

CROP REPORTS ARE WATCHED IN OLD LAND

London, England.—The truth about the Canadian wheat crop is anxiously awaited here because of despatches from Canada giving rise to the impression that there will be a shortage and that the price will be higher in the Old Country this coming winter.

The Winnipeg correspondent of The Daily Telegraph cables that Canada is faced with the prospect of another short wheat crop, adding "this important information was not obtainable from the Wheat Pool, because of their attitude that 'we told the truth last year and the world would not believe it; now the world can find out for itself.'"

He reports, too, that the Canadian farmer resents being called a Shylock because he wants a price for his wheat.

This despatch to The Daily Telegraph contrasts with the optimistic statement of the Dominion bureau of statistics, and has left the public here in doubt as to what prospects really are.

If the Canadian wheat crop is short and the price of bread rises, there will be an outcry by the protectionists and the Empire free traders for an understanding with Canada, and they will use this fact to advocate protection against Argentina when in favor of Canada.

Mail Plane Badly Damaged In Crash

Two Passengers From Calgary Cut By Flying Glider

Moose Jaw.—An air "bump" under the left wing of a mail plane caused it to drop 10 feet to the ground, collide with the flood light at the east end of Moose Jaw flying field, and flip onto its back. Two passengers, R. V. Price and F. A. Ogilvie, both of Calgary, and proceeding to the Lions' convention at Regina, were cut by flying glider.

The plane, Boeing CF-A10, was badly damaged, and the tail section, most of the engine mount, bent and twisted. Work of repairing the machine was commenced the next morning.

Major Thompson, superintendent in charge of the Western Airways plant at Moose Jaw flying field, said the accident was unavoidable and that the pilot was in no way to blame for what had occurred. "It was just one of the bad 'breaks' which happen," he said.

Will Visit Native Land

Two Hundred and Fifty Icelanders Will Attend Celebration in Homeland

Winnipeg.—Two hundred and fifty Icelandic residents of Western Canada, most of them from Minnesota, left here by special train for Montreal, where they will embark for their homeland to attend the millennial celebration of the Icelandic parliament. Hundreds of their compatriots crowded into the station to give the party a royal send-off.

They sail from Montreal on the Canadian Pacific liner "Montcalm." Prominent in the party were Hon. M. G. Bjornson, of St. Paul, who will represent the state of Minnesota at the celebration, and Captain Sigfridur Jonasson, of Arbog, Man., a resident of Canada for 58 years who, despite his 78 years, was among the most enthusiastic of the group.

Settlement For Swedes

Stockholm, Sweden.—Some Swedish people, who fled from the Ukraine because of unsatisfactory conditions under Soviet rule and who came here with the idea of joining relatives in Canada, have already emigrated to the Dominion. Arrangements for establishing the remainder in Sweden are proceeding satisfactorily. A public subscription started for the purpose, resulted in about \$250,000 being raised and in addition a grant was made by Parliament.

Urges Second Term For Hoover

Fort Myers, Fla.—Thomas A. Edison told interviewers here that he would urge President Hoover to seek a second term for a second term. The aged inventor said "the United States government is the most inefficient big business organization in operation today," and he added he did not blame the president. The vast size of the business, he said, was responsible.

A chain of airports from coast to coast is advocated by the Canadian Chamber of Commerce.

NOTES AND COMMENTS

To win support something definite
must be offered by a political party.
The majority of the public have com-
mon sense, and are not to be carried
away by windy oratory which has
nothing substantial behind it or that
fails to carry conviction.Fred White, M. L. A. of Calgary,
spent a busy day on Sunday in the
Pass towns. On Sunday night he
held a meeting here, giving a clear
outline of the policy of the Canadian
Labor Party, and its method of pro-
cedure in agitation for progressive
legislation in the interests of the
workers.One point Mr. White emphasized
in his address, to the effect that to
provide wider help in old age pen-
sions and widows' allowances, an ex-
panding budget, or more expense,
must be anticipated. The opponents
of the present government are urg-
ing less expenditure, and made it a
plank of their platform, but they can-
not reduce the expenditure if fur-
ther advances are to be made in pro-
viding for those who in the eventide
of life are unable to support them-
selves.**Local News**A bush fire broke out on Monday
north of Blairmore, and the air was
quite hazy with dust and smoke, giv-
ing the appearance of late summer.Elections are taking place today for
mine union officials in the local uni-
ons, and the hospital board. There
are quite a number of names on each
ballot.Robert Mitchell, assistant electric-
ian at McGillivray mine, was badly
injured about 8 a.m. on Monday by
falling across three transmission
lines carrying 2200 volts each.Picnic parties were the order of the
day on Sunday, it being an excep-
tionally fine day. Some went to
Lille, others went to Crows Nest
mountain, while the fishing enthu-
siasts went everywhere where there
were fish.Fishermen went to the north fork
on Sunday and owing to the high wa-
ter the catches were very small. Al-
bert Knowles claims to have caught
the largest fish, while Tom Holstead's
party got the largest catch, bringing
in 43. Mr. Ford and his sons George
and Lawrence were not so fortunate.A man for political honors must
have real ability to start with, ability
to get results. He must be broad-
minded, and able to discuss matters
with everyone and be bound to no
clique, or be under the influence of
any one's dictation. He must have
mental ballast, and a training in a
wide variety of effort.The first round of the McGillivray
Cup men's singles competition is to
be completed today. Members are
urged to make their entries for the
annual tournament of the Crows
Nest Tennis Association, which
takes place on June 29-30 and July 1.In order to better serve the ladies
of Coleman and district, a ladies' de-
partment has been added to Graham's
barber shop, with Miss Sherban of
Calgary in charge. Make appoint-
ments by phoning 249 W., and prompt
service will be given.Advertising stimulates business.
People shop where they are invited.
Do not blame the public if they for-
get you, for they have a short mem-
ory. Keep in the public eye by ju-
dicious advertising in The Journal. It
builds good will and increased busi-
ness.

Extensive Program Has Been Arranged For This Season's Work In North

The growing importance of Canada's far North is indicated in the extensive program now being arranged by the Department of the Interior through its North West Territories and Yukon Branch for its work in the Territories during the coming season. The activities and projects contemplated include arrangements for the reception and establishment of the Government reindeer herd, the enlargement of the medical service, the organization of the warden patrol in the Thelon Game Sanctuary, the extension of the 1930 voyage of the Department's expeditionary ship, and the opening to prospectors of the Coppermine mineral reserve.

During the coming year most of the areas in the Northwest Territories where there are trading posts and settlements will be under active medical surveillance. Dr. Livingstone, senior medical officer, has already left for Churchill from which point he will travel by dog team to Chesterfield, where the Department of the Interior has built a house for his accommodation. He will visit all the Eskimo settlements en route. With Chesterfield as a centre, Dr. Livingstone will be in touch with Baker Lake and the other important posts in the districts on the west side of Hudson Bay. He will remain in charge of this post until the arrival of the Department's patrol ship "Beothic" early next autumn, when he will be replaced by the ship's doctor. Dr. Livingstone will return to North Sydney on the "Beothic" and will later proceed to Fort Smith, N.W.T., which is the Department's headquarters for the District of Mackenzie. At this point there is a large mission hospital, and he will take over the duties of the retiring medical health officer and have general supervision of the medical work of the district. The scattered nature of the medical work in the Mackenzie delta and Arctic coast to the east and west, under Dr. J. A. Urquhart, stationed at Akivik, has necessitated improved means of transportation, and to meet this a motor hospital boat has been built at Edmonton and with the opening of northern navigation will be taken to Fort Smith. From this point it will proceed under its own power to Akivik and at the same time carry Mr. J. A. McEwen, chief inspector, on his annual tour of the Mackenzie district. Other departmental medical officers in the Territories are Dr. R. D. Martin, at the mouth of the Coppermine, and Dr. H. A. Stuart, on Baffin Island.

Preparations for the reception of the reindeer herd of 3,000 head, now on its way overland from Alaska, which will arrive early in 1931, will be completed this year. Mr. R. T. Forslid has arrived at Akivik by aeroplane and will supervise the erection of corrals and buildings at the east and west ends of the Mackenzie delta. The Coppermine mineral reserve will be opened for staking on July 1, and Major L. T. Burwash, who made an inspection of this field in 1929, will go in by aeroplane early in the season so as to be on the ground as soon as possible. Let it be mentioned, however, that if the weather permit, he will fly to King William Island to carry on further investigations with regard to the fate of Sir John Franklin.

The organization of the regular patrol of the Thelon Game Sanctuary for the protection of wild life, particularly the musk-ox, will be completed this year. Mr. W. H. B. Hoare, who returned last autumn after a twenty months' investigation of the area, will go north to supervise the erection of warden cabins at the east and west ends of the sanctuary and the establishment in the reserve of wardens and native helpers.

This year's cruise of the Department of the Interior's expeditionary ship "Beothic" will be slightly different from that of former years in order that she may enter Lancaster Sound after the ice has moved out. If conditions then permit she will proceed to Winter Harbour, Melville Island and renew the supplies in the cache established by Captain Bernier, of C.G.S. Arctic, in 1908-9, which proved of such service to the northern party of the Canadian Arctic Expedition of 1913-18, and to Inspector Joy of the Royal Canadian Mounted Police during his notable winter journey of 1,800 miles, in 1929.

In addition to her usual work in carrying relief personnel and supplies to the various posts in the Canadian Arctic archipelago, the "Beothic" will take to Lake Harbour, on the southern shore of Baffin Island, sufficient lumber and supplies to erect a house for a resident officer there. This house will be occupied for the next

two years by Mr. and Mrs. J. Dewey Soper. Mr. Soper will continue his investigations respecting the blue goose and its nesting ground, will survey certain parts of the shore line, and make observations in regard to terrestrial magnetism. Mrs. Soper, who is a trained nurse, will be of great assistance in cases of illness among the natives.

The services above mentioned, it will be noted, nearly all additions to the administrative work of the North West Territories and Yukon Branch, which has been steadily growing for many years, and they show both the increased interest which citizens are taking in Northern Canada and the forthrighting which the Department of the Interior is exercising to ensure that the needs of the Territories will be adequately met.

Judgments Act Reciprocal

Ontario Makes Law Court Pact With Province Of Saskatchewan

The reciprocal enforcement of the Judgments Act is now in operation between Ontario and Saskatchewan, according to an announcement made by Attorney-General W. H. Price. The act was recommended in 1928 by the Dominion committee on uniformity of law and was passed by all the provinces last year, but was made subject to proclamation by order-in-council.

Ontario put through the order to make it effective on May 8, and Saskatchewan proclaimed its act on May 26. It will now be possible for a business concern to get a judgment in Ontario and collect from a person living in Saskatchewan without the necessity of suing on judgment, as was heretofore the practice.

Colonel Price stated that legislation in his opinion, was of far-reaching benefit, and he expressed hope that the other provinces would soon see their way clear to follow in the course set by Saskatchewan. The committee on uniformity of law expressed the opinion, at the time they recommended such legislation, that general adoption and operation of it was most desirable.

Cattle In Prize Class

The highest individual price and the highest average price for the cattle from any one contributor at the Saskatchewan provincial sale at Toronto, were secured by the six animals sent by the Canadian Pacific Supply Farm at Strathmore, Alberta. A four-year-old heifer from the herd brought \$1,525, the highest price of the sale; while a young bull brought \$675, the highest prize in the bull class. The six animals averaged \$658 as compared with \$327 for the average of the 64 animals vended at the sale.

Built First Automobile

Andrew Lawrence Riker, 81, designer and builder of the first gasoline-propelled locomotive, died recently at Fairfield, Conn. In 1884, he designed and built his first automobile, an electric tricycle. He introduced the sliding gear transmission, steel frame and the four-cylinder vertical motor with high tension ignition.

The automotive industry in the United States used 47,000,000 yards of upholstery cloth in 1928.

Labrador, often thought of as a land of the far north, is in reality no farther north than Scotland.

(By Anabelle W. Whittington).

2947

One of the most practical fashions of the season for the school miles of 6, 8, 10 and 12 years is illustrated in navy blue wool crepe with beige crepe collar and cuffs. The scallops of collar and cuffs are accented by vivid red taffeta bias binding. Matched shade red bolero buttons emphasize side scalloped closing of bodice. Red suede belt completes this jaunty outfit.

Style No. 2947 is made at a remarkable saving, for in the 8-year size, it takes but 2 yards of 40-inch material with 1 1/2 yards of 32-inch contrasting. The bodice has a one-piece back; front in two sections. Seamed at sides and shoulders. The two-piece skirt is seamed at sides and pressed into inverted plaits at either side of front and attached to bodice. It is now practically ready to set sleeves into armholes and stitch collar at neckline.

Wool jersey in French blue with collar and cuffs of blue and white checked woolen is very smart. Beige and brown checked woolen with plain brown is sportive.

Featherweight, tweed in heathered tones with plain red woolen can be worn all through the Fall without a top coat.

Orchid chambray with white pique, cotton broadcloth in geometric print in red and white with plain white pique, red and white gingham check with plain white linen, and tan sports weight linen with brown are attractive fall fabrics.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Places Huge Stamp Order

The Chinese government has just placed an order for the printing of 2,500,000 stamps. The contract was secured by a London firm and is said to be the largest order of its kind ever given to a firm in England. Printing of the stamps will start at once.

Prospects For Good Trade

Fresh Milk Would Find Ready Market In Orient

Canadians of all classes are accustomed to a fine quality of fresh milk. Most of them will be astounded to learn that there are countries where such milk is not available even to people who are ill. It is another revelation of our luxurious privileges that are just taken for granted in a rich country.

Having learned that some of our surplus products of the dairy might meet a crying need in the Orient, Canadians will prudently seek to discover if some business can be done in supplying the need. It requires fourteen days for a liner to carry the milk across the Pacific to Shanghai in refrigerators. Indications are that it can be done successfully. It has been transported to London in good condition. Both China and Japan are short of milk. There is an opening for Canadian export that would be very welcome among people who are rapidly adopting our diet. It demands skilful executive work to place Canadian products on the distant Oriental market, but even expensive experiments offer prospects of lucrative trade, and that is what will build up this country.

Rust Expert To Visit England

Dr. Craigie, Of Winnipeg, Will Spend Year In Study

Dr. J. H. Craigie, head of the Rust Research Laboratory, Winnipeg, is leaving at the end of July for England where he will deliver a paper in connection with his rust investigations at the International Botanical Congress, which is being held at Cambridge in August. Dr. Margaret Newton, of the Winnipeg Rust Research Laboratory is also attending this conference and will later visit various investigation laboratories in Britain and the Continent.

Dr. Craigie plans to spend the next year at Cambridge and the other institutions studying their work and methods in connection with plant diseases; while Dr. Dillan-Craig, of Cambridge, will visit the Winnipeg institution in a similar capacity for the coming year.

Dr. Craigie was recently awarded his doctor's degree at the University of Manitoba, his thesis being on his work in connection with the discovery of sex in rust fungi. His work in this connection was considered the most outstanding achievement in connection with rust investigation that has yet been accomplished.

Planning New Air Mail Line

Group Of Japanese Business Men Behind Scheme Is Reported

A project of inaugurating a regular passenger and mail air line between Japan and the United States and Canada to shorten the distance between the continents to three days, is reported to have been organized by a group of Japanese business men and financed at a capitalization of \$75,000,000. Four huge airships, resembling the Graf Zeppelin, which encircled the globe last year, are expected to be employed for the regular air trips.

The Japanese Government has been officially asked for the necessary permits and those behind the enterprise say they propose to go right ahead with their preparations. Saki Hoshino, noted Tokyo business man and one of the promoters, says the plan was projected last year shortly after the visit of the German dirigible. The single fare for a passenger, he said, would be \$1,500.

Deaths in civil aircraft accidents in England last year totalled 33.

Increase Of Wild Life In Canada's National Parks Proves Sanctuaries a Success

A dispatch to the Commissioner of National Parks, Department of the Interior, from A. Bryan Williams, Game Commissioner of British Columbia, announces the safe arrival of the carload of elk recently shipped from Buffalo National Park, Wainwright, Alberta, to the Queen Charlotte Islands. The animals are a donation by the Dominion to the Provincial Government for restocking purposes on these Islands. They were captured from the wild elk herd, now numbering over 600, roaming the Buffalo reserve and were particularly fine specimens of their kind. They were cut out of the main herd by the park riders, corralled until safe to handle, and then placed in specially constructed crates. Through the co-operation of the Canadian National Railways, a special baggage car was provided which was attached to the regular passenger train for Prince Rupert, and went through express to that port. Here the elk were transferred to a boat sailing to the Queen Charlotte Islands. No loss or injury was sustained in transit and according to the report the animals are already settling down and adapting themselves to their new surroundings.

The successful transfer of wild animals as large as these by rail and water for over 1,000 miles was in itself an achievement; but the greatest interest attached to the undertaking lies in its significance from the conservation point of view. A scientific philosopher has described this era as the close of the age of mammals. From every part of the world in the last quarter of a century have come reports that wild life was being destroyed at a far greater rate than it could reproduce itself. The inevitable spread of civilization, with its concomitants—the breaking up of land, draining of swamps, felling of forests and many other operations—has been destroying the world over, the natural homes of big game. In recent years, too, the forces of destruction due to mechanical invention and greater facilities of transportation have increased enormously, and disastrous inroads have been made in many species.

A few years ago there was organized in England a conservation movement known as the Society for the Preservation of the Fauna of the Empire. Its president, the Rt. Hon. the Earl of Onslow, in reviewing the depletion of wild life throughout the Empire today, stated that the only satisfactory method of ensuring the preservation of wild animals in the far distant future is by the formation of sanctuaries or the establishment of national parks. As an example of what could be accomplished, he cited the policy of the National Parks of Canada.

It will be recalled that about twenty years ago the national parks of this country were made game sanctuaries not only in name but in fact. An adequate system of warden patrols was established and the regulations rigidly enforced. As everyone knows the results have surpassed the most sanguine anticipations. Sheep, goat, bear, elk and deer, which had practically disappeared from these regions, have now come back in such numbers that the parks have become the wild life reservoirs of the West. The British Columbia Government has been drawing on them to restock its own depleted game areas. Two regions in the southern part of the province in recent years have been stocked with Rocky Mountain sheep—that much prized trophy of

the sportsman. Two or three years ago a herd of elk was also shipped from Buffalo park to restock areas between the Okanagan and Kettle valleys. The National Parks of Canada have also been able to furnish for their increasing stocks, big game animals for zoological exhibits or as nuclei for conservation experiments in various parts of the world.

These results prove clearly the truth of Lord Onslow's contention in a recent report, that an ultimate world bankruptcy in wild life need not be accepted as inevitable. While adequate protective measures, he pointed out, will help to maintain the parks, it is only through the creation of national parks such as have proved so successful in Canada, that the final rescue of many species can be assured. Canada, he declared, is setting an example in conservation to other countries and its abundant success is a happy augury of what others may achieve.

Scottish Ayrshire

Export Trade Grows

Canada and States Taking Large Consignments Of Cattle

Scotland is rapidly developing an important export trade in Ayrshire cattle, the country's native dairy breed. The other week a consignment of 19 pedigree beasts, mainly from Ayrshire, was sent to Ontario, Canada.

Hugh Bone, secretary of the Ayrshire Cattle Herd Book Society, says that the export trade has increased greatly in last two years. He added:

"We have exported 173 head of Ayrshire cattle since the end of March, and at the average price is between \$90 and \$100 a head it is obvious that the trade is a very valuable one. Last year we presented 30 head of Ayrshires to the University of British Columbia to form the nucleus of a herd there, and since then two more consignments have gone there. Canadian and American dairymen are the best foreign customers for Ayrshires. They find that our cattle can produce milk with a higher butter fat content on small rations. Three Ayrshires can thrive on poor land where only two cows of other breeds could."

Young Poultry Fanciers

Fourteen Boys' and Girls' Clubs In Armstrong, B.C.

Armstrong, in the Okanagan Valley, holds the record among the towns of British Columbia, if not of Canada, for juvenile poultry fanciers, having no less than fourteen boys' and girls' poultry clubs with a membership of 120. This is largely due to the enthusiasm and organizing ability of G. W. Cameron. The majority of these young folk met in conference recently. They had a very enjoyable and profitable time, and as they posed for a group photograph, they made an inspiring spectacle, boding well for the future of the industry in the premier poultry province.

Bank Manager: "I understand your husband can't meet his creditors."

Client: "I don't believe he wants to, particularly."

Faint heart never won fair lady. Nor did it ever get away from one.

The astronomer's day is 23 hours and 56 minutes.

ON THE MIDWAY AT THE PROVINCIAL EXHIBITION, REGINA

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude boric acid. What your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful of water neutralizes many times the volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

WORLD HAPPENINGS BRIEFLY TOLD

Sir John Simon, head of the recent British commission to India, plans to return to India, August 3, aboard the "Duchess of Atholl."

French ports of Calais, Boulogne, Havre, Dieppe and Cherbourg are reported well satisfied that the British Government has decided against a tunnel under the English Channel.

Carol Caraiman, citizen, has become King Carol II. of Rumania, by a vote of the Rumanian parliament, which lacked only one of being unanimous.

Andrea Macedo, a Portuguese, sailed from Montreal, June 2, for New York, in a 20-foot sloop named the "Aurora." He was the lone passenger, sailor and navigator.

Amy Johnson, whose lone flight to Australia has roused the British, has been given \$50,000 by Lord Rothermere's Daily Mail in recognition of her performance.

Two hundred members of the Agrarian Producers' Union, of the Argentine, will arrive at Victoria, B.C., on September 14, to commence a tour of Canada.

Passenger trains on the Continent are fast being equipped with radio receivers for passengers. The latest is the train from Havre to Paris. Passengers can hire headphones and listen in to Eiffel Tower Radio, Paris, or radio station 5XX.

The Prince of Wales and Prince George have both entered 'planes in the King's cup air race to be held July 5. Squadron Leader Compton, who has been the Prince of Wales' pilot on recent flights, is expected to fly the royal heir's entry.

For the first time an aeroplane will be used for inspection of Indian agencies and reserves in the Mackenzie River district. Inspector C. C. Parker, of the Department of Indian Affairs will leave Waterways, Alberta, early in July, his most northerly objective being Herschel Island.

Western Canada New Mecca

Request for Information Received From United States Motorists

Motorists in many parts of the United States, having exhausted the possibilities of travel in Eastern United States, are now looking to Western Canada as their new Mecca. This was the frank statement in a letter received by the local office of the Saskatchewan Motor Club from its Southern Illinois affiliation, the Auto Club of Egypt, which urgently requested a generous supply of maps, booklets, holiday and road information concerning Saskatchewan.

A Century Old Song

That fine old song "Rocked In the Cradle Of the Deep" a perpetual challenge to bassists—was written by Emma Willard, nearly one hundred years ago. Emma, an American poet of note in her day, wrote it on July 14, 1831, after a violent storm at sea during a voyage she made aboard the good ship "Baltic," says Thomas P. Madigan (in "Word Shadows Of the Great"). So that she was one person at least who went to sea before writing about it.

In the first three months of this year 10 British army aviators were killed in five crashes.

Florida has a longer coast line than any other state in the Union.

Rheumatism GONE

"After years of rheumatism, now in perfect health," says one. Thousands write rheumatism, arthritis, neuralgia, sciatica, "Train-a-dine" "Constitutional" "Our Fruit-a-dine" from druggists.

W. N. U. 1842

Jubilee Impressions

A Few Reasons Why Manitoba Is Holding Celebration

The enthusiasm with which the people of Manitoba are preparing to celebrate the Diamond Jubilee of the Province, on July 15 next, might lead an outsider, unfamiliar with our progress and development, to enquire what it was all about. He would need to be told that the Province was formally admitted into the Canadian Confederation on July 15, 1870, and that the present generation was showing its pride and satisfaction at what had been accomplished in the sixty-year period.

The outstanding fact in connection with Manitoba's history as a Province is that her people have practically achieved the impossible in the production of foodstuffs. One need not go far back into the annals of the nineteenth century to find a positive and emphatic declaration of opinion on the country's resources, from a man whose position should have given him the right to speak with authority. He was foolish enough to insist, on more than one occasion, that wheat would never grow in any place more than ten miles from the Red River. His cue was taken up by many lesser "authorities," and the whole territory was apparently doomed and damned as a source of cereal food supplies. What has been the result? Manitoba wheat has secured a firm position of leadership in the markets of the world, and has held that distinction for more than forty years. Without desiring to reflect in any way upon the fertility of the Red River district, it may be added that most of the wheat is produced much more than ten miles from that famous waterway. Oats and barley add their testimony in rebuttal of the foolish prophecies of men who should have realized the value of science. The cultivation of grain, in fact, has provided the foundation for Manitoba's progress. Farmers who knew their business came here from other lands, mostly from Ontario, to take a look at the soil and examine the other elements of crop production. In nearly every case one look was enough. Those who stayed and worked with energy and determination, succeeded in establishing forever the reputation of this Province as a centre of high-class agricultural property. They were not daunted by wild tales of visitations of grasshoppers, drought, frost, hail, floods and all the other torments of the "craze-hanging" era. Nor did they flinch on the rare occasions when they encountered these torments singly or in combination. They persevered and won through; perhaps they did not realize at the time that they were "achieving the impossible."

The dire predictions regarding the possibilities, or rather the impossibilities, of grain production were repeated and multiplied when it came to the consideration of other items relating to human sustenance. They were, it seems, to be disregarded as possible factors in the economic life of the new Province. Could live stock, for instance, be expected to survive in a land where even the buffaloes, with unlimited grazing areas at their disposal, found it difficult to exist? Absurd, according to the wisecracks of that day. But the agricultural pioneers did not agree with them. They "knew their business" but they knew even more about their hay and grass, and chopsticks, and straw stacks and shelter and stabling. They knew, too, that if a little care were exercised in choosing the proper attention were accorded the stock during the comparatively short periods of abnormal winter weather, good results could be obtained. The justification of their faith is to be found in the prize distributions at leading stock fairs throughout Canada and the United States during the past thirty years. Manitoba cattle

have held their own with the best that could be produced anywhere. It is a matter of gratification to the people of Manitoba that her worst citizen, his Honor the Lieutenant-Governor, James Duncan McGregor, has risen to his eminent position in the community largely through his success as a breeder of pure-bred cattle. That success has been due to intelligence, persistence, hard work and a refusal to believe that "it couldn't be done."

The story is the same in regard to other phases of farm activity. Who is there among the middle-aged people of Manitoba who does not remember the day when butter from Eastern Canada was considered essential to human existence here? A quarter of a century ago it was almost impious to suggest that this Province should manufacture its own butter. Today the Manitoba product is known and appreciated all over Canada, and in many foreign markets as well. During the past ten years it has won most of the cups and prizes at leading stock fairs in every part of the Dominion, and has set a standard in the manufacture of butter which is a model for creameries in all the other provinces. As for eggs, the leading authority in the Dominion is on record with the statement that for excellent flavor and food value the product of the Manitoba hen is invaluable. Honey represents another instance where local achievement in the matter of quality has carried the foreign trader. The canny housewife who buys a pair of Manitoba honey knows she is getting the best that is to be had.

The refusal to lie down or retreat in the face of serious problems has always been a characteristic of Manitoba pioneers, and luckily that fine old proverb in the mouths of their descendants. Courage, patience, enthusiasm, perseverance and idealism, coupled with a lavish expenditure of muscular energy and perspiration, has gone far towards giving Manitoba so proud a place in Canada and in the Empire. Incidentally the prophets of famine and starvation have been put to shame. That in itself is worth while—Old Timer.

No Longer a Mystery

New Zealand Trade Commissioner Knows Why Canada Imports Sausage Casings

"Until I went to Canada in 1926, I could never understand why the Canadians spent so much money in importing sausage casings from New Zealand—about \$70,000 pounds a year. It is now," said Mr. W. Collins, New Zealand Trade Commissioner to Canada, at the Auckland Chamber of Commerce luncheon.

"I found the explanation when I landed at Vancouver, and went to a food market. I was greeted by a small boy, who solicited business in these words, 'Hot Dogs, 10 cents. Good for folks.'"

"In my travels through Canada I soon came to realize the enormous production and sale of the so-called 'hot-dog,' and I did all I possibly could to increase the production of that delectable food. When I am among the Canadians again, I am going to use my best efforts to induce them to put in a bid with the bread and mustard that always accompany the 'hot-dog.' If they do, it will mean at least another 10,000 tons a year of sausage casings from New Zealand."—Morning Herald, Auckland.

Protection For Air Pilots

Royal Air Force Is Introducing Fireproof Clothes and Wings

Fireproof clothes for airmen and fireproof wings for their machines are to be introduced in the Royal Air Force. It is expected that as a result the tragic toll of deaths following airplane crashes will be reduced to a minimum.

A cheap and easily made fireproofing solution has been discovered for treating clothes and other fabrics.

It is a mixture of borax and boric acid, and is said to be so effective that when a four-ounce cotton fabric was treated, it could not be ignited by a naked flame.

The Fabrics Co-ordinating Research Committee has already approved the solution's use.

Fast Travelling

George McDougall, a member of the Regina Flying Club, left for Winnipeg one afternoon recently, with W. Corson in a Moth 'plane arriving in Winnipeg at 7 o'clock. Half an hour later he climbed aboard the mail 'plane for Regina arriving at 10:30, having made the round trip in eight hours.

"You're a dear, sweet girl," sighed the dependent owner. "God bless and keep you! I wish I could afford to."

One shipyard in Glasgow, Scotland, now is employing 70,000 men.

Cutworm Outbreaks, 1930

Are Present In Exceptional Numbers and Over Wide Areas (Kenneth M. King)

The cutworm outbreak which was predicted for this spring is materializing in very serious proportions and over wide areas. Two types of cutworms are involved—The Red-backed cutworm, which is generally throughout the park belt, and the pale western cutworm in a few districts as detailed below. It is important to distinguish between these two kinds, because of a marked difference in means of control. These cutworms are present in exceptional numbers, and the early hatching and generally dry conditions of this season are conducive to a heavy rate of damage, although the coolness of the spring has been somewhat unfavourable to the cutworms.

Districts involved—The Red-backed cutworm seems to be generally abundant this year in the bush country, throughout the park belt, and into the adjoining margin of prairie land. It is particularly destructive in gardens and to the broad-leaved crops, though cereals may also be seriously damaged.

The pale western cutworm occurs in two areas—(1) It is extremely abundant this year in south central Saskatchewan, in the heavy soil of the Regina plains. The outbreak definitely extends from Balcarres, Indian Head and Sinitaulta on the east to Moose Jaw, and possibly to Eskbank and Central Butte on the west.

Southwardly, it probably extends to the International Boundary, in the heavy soil of the Regina plains. An outbreak is also expected in extreme western Saskatchewan, especially around Altona, extending possibly to Madison, on the east, and Maple Creek to the south.

How To Distinguish—Cutworms can be readily distinguished by their soft round bodies, and their habit of cutting off the plants completely at or near the surface of the ground. The only other spring pest of similar type of damage is the wireworm, which can readily be distinguished by its smaller, hard, bright shiny yellow body, and the fact that it attacks the seed and lower stem, seldom cutting off the plant completely.

It will be noted that the two types of cutworms mentioned may both be abundant in certain districts. The Red-backed cutworm may be readily distinguished by the definite coloration—usually a dull red—upon the back, and the distinct lines lengthwise of the back. The pale western cutworm is almost colorless, except for the slight color given by the food and other contents of the body. It usually has a very greasy appearance.

Control Measures—Red-backed Cutworm: Poisoned bran bait is a very effective and practical means of control, either in gardens or in large fields, for all cutworms of the red-backed type. The important thing is to watch the fields closely and use the bait in time to save the crop. If a field is ruined, use of the bait will permit immediate re-seeding safely.

Three things are essential in using this bait for cutworms:—(1) The bait must be put out in the evening,

since it is only at night that these cutworms come above the service to feed. (2) A warm night should be chosen; if the thermometer registers less than fifty degrees Fahrenheit at sundown, it will be too cool to secure a good kill of cutworms. Best results are secured when the surface soil is moist. (3) The bait should be evenly spread over the surface, since the worms must come in contact with the bait in order to feed on it; a very thin application, 20 to 30 pounds per acre, is sufficient.

The bait is prepared as follows:—Bran, 25 pounds; Paris Green, ½ pound for white areas, 1 pound; cheap molasses, 1 quart; water, 4 or 5 quarts.

The dry bran and poison are first thoroughly mixed together (keeping mouth and nose covered with a damp cloth, during the process). The molasses should be dissolved in the water, and this mixture then slowly stirred into the poisoned bran until it is thoroughly moistened and free from lumps. CAUTION—Keep any unused bait or poison out of the way of children or animals.

Pale Western Cutworm—Poisoned bran bait has not proved effective against the pale western cutworm; (hence the special importance of distinguishing it from the red-backed kind). In fact, there is very little that can be done, where fields are heavily infested by the pale western cutworm, except to avoid waste of seed by delaying re-seeding until the end of June; this is, of course, too late for most crops, but barley may perhaps be used, or oats for green feed or hay.

Where only parts of a crop are destroyed by this cutworm, the remainder may be partially protected by ploughing a deep furrow around each undamaged area.

Reports and Queries—Circulars giving fuller information about either or both of these types of cutworms may be had upon request.

Immediate reports of any important outbreaks which may occur in your district would be welcome.

Reports or queries may be addressed either to the Department of Agriculture, Regina, or to the Dominion Entomological Laboratory (University of Saskatchewan), Saskatoon.

Large Entry From B.C.

Canada will have on display at the Crystal Palace, London, England, during the fourth World's Food Congress, July 22-30, a grand total of 863 birds, with 453 exhibition birds and 244 production birds. The remainder will be made up of ducks, geese, and pigeons. A few specially good rabbits are also being sent forward. British Columbia's entries total nearly half of the production breed birds.

A Nevada man has invented an automobile attachment that flashes a lamp on the instrument board of a car when a tire is punctured.

SUNDAY SCHOOL LESSON

JUNE 22

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all the nations."—Matthew 28:19.

Lesson: Matthew 28:1-20. Devotional Reading: Psalm 116:1-9.

Explanations and Comments

The Empty Sepulchre and His Message—verses 1-4.—The Gospels do not describe the resurrection; they report it simply and briefly. Matthew tells us that the stone was rolled away, and the other Mary to the sepulchre late on Saturday, the Jewish Sabbath, as Sunday, the first day of the week, began to dawn. Mary Magdalene was from Magdala, a city on the western shore of the Sea of Galilee, who had been freed from "seven demons," Luke 8:2, and who is often wrongly confounded with "the woman who was a sinner," Luke 7: "The other Mary" was the mother of James, Mark 16:1. These two had been present at the crucifixion and the burial, Matthew 27:56, 61.

Matthew adds here, what no other Evangelist does, that there was a great earthquake, and an angel rolled the stone away and sat on it. His appearance was dazzling like lightning, and his raiment white as snow; through fear of him the watchers trembled and became as helpless as dead men. The Greek word for angel means "one who is sent as a messenger." The angel "answered" the look of amazement and fear of the women and said: "Fear not ye, for I know that ye seek Jesus who hath been crucified." "He is not here, he is risen, as he said." The angel recognizes them as friends and says: "Go and tell my brethren for the soothing tone of the address. The angel recognizes them as friends and says: "Go and tell my brethren for the soothing tone of the address. The angel recognizes them as friends and says: "Go and tell my brethren for the soothing tone of the address."

The Glad Message, verses 7, 8.—"They were not to stand long in mute amazement, but were to carry the glad news to others: 'Go quickly, and tell His disciples, He is risen from the dead; and lo, He goeth before you into Galilee; there shall ye see Him: lo, I have told you.' Recall His promise to the disciples Matthew 26:32.

"The Lord is risen indeed, He is here for your love, for your

Not here in the grave, nor the sky; But here where men live and die; 'Why seek ye the living among the dead?'"

Richard Watson Gilder.

The Final Interview and Commission, verses 16-20.—"All authority hath been given unto Me in heaven and on earth"; in these words Jesus asserted His royal authority; His right to command rested upon the fact that He is King. The future of His Kingdom was His supreme concern, and He proceeded to issue His royal command: "Go ye therefore, and make disciples of all nations, baptizing them into the name," i.e., confessing the name, "of the Father, and of the Son, and of the Holy Spirit, teaching them to observe all things whatsoever I commanded you."

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CHAPTER XVII.—Continued.

"Not he," said Grandma, "but he must have been made of India rubber to get off as easy as he did. Doctor Carter was just leaving the office, and the man landed right in his lap, so to speak, so he got a patient. I must say, if such a thing had to happen it was nice it happened where it did, on account of the doctor. It was most two hours before the man was fixed up and steady enough to go along. The doctor took two stitches and got paid three dollars more. It was a real interesting morning, and four people came in this afternoon just to hear about it. Well, dearie, did Jim tell you the news?"

"News?" echoed Charmian, "I should say you'd told it yourself. You're out of breath, dear, with it, talking so long and fast. I'm sorry to be late, but Jim was going to East-boro and it seemed a pity to miss the ride when the foliage is so beautiful. I wish you could have seen it, too."

She turned toward the kitchen, the impending meal on her mind, but she old lady tapped her with a question: "But didn't he tell you about his mother?"

Charmian came back to ask: "What about his mother? He never mentioned her."

"You must have made yourself extra diverting then," said Grandma seriously. "George K. stopped in, and 'twas he told me the news. It doesn't seem hardly believable—but Sarah Bennett's going to California!"

"To California?" repeated Charmian in amazement. "And leave Jim?"

"My stars!" ejaculated the old lady. "Don't you know that Sarah Bennett wouldn't any more think of going without Jim than she'd think of going without a pocket handkerchief? It seems as though she'd been living very well, and Edward Howe thought a warm climate might help her. Her twin sister, Sophie, lives somewhere out that way, and they're going to her. What's more, George K. says if the climate agrees with her, the chances are they'll never come back! Didn't I say it had been an exciting day?"

CHAPTER XVII.

That night when she lay in bed, staring at a crack in the ceiling that showed weirdly bright in the light of the harvest moon, Charmian wondered if the evening meal had been fit to eat. She had gone about its preparation in a daze, wondering why Jim hadn't spoken of this big change in his life—feeling hurt that he wouldn't have confided in her—wondering how Wickfield would get along without her old playmate to drop in of an evening, or to pick her up after school hours as he had today—telling herself vigorously that she wasn't one bit in love with him—admitting in the next breath that she would miss

Sun Burned?

Then rub afflicted parts with Minard's and watch them heal. Minard's for campers.

W. N. U. 1842

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling. This indicates a torpid liver. Headache, Dizziness and Blisters surely follow. You must stimulate your liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, purify the blood, remove all poisons and poisonous drugs, make easy to swallow, and not habit forming. They are not a purgative that cramps or sours the stomach, but a gentle follow-up, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

ly, and now she's doing her best to ruin Jim's."

"He should stick up for his rights, then," said Charmian coldly, and lifted her chin the least bit higher.

George K. cast upon her a sidelong glance.

"Did you ever live in the house with Sarah Bennett?"

"Did you?" Charmian countered. "No, thank God!" George K. exploded, "but I know her kind. They break the spirit after a while, Charmian, and Jim, poor boy, has known no other close companionship. Sometimes I wonder how he's kept his sense of humor and his kind heart."

Well, as they reached the corner where Main Street turned off toward District Four, "I'll be late at the bank if I escort you any farther. You'll remember not to worry?"

"I'll remember, Uncle George," she answered gratefully, "and—thanks."

To Grandma the morning seemed to drag. John Carter had left a stop for his customary chat. And after breakfast, and even the R.F.D. man was behind time, so couldn't he brought was an advertisement! Grandma tossed it scornfully into the waste basket, and wished that something interesting would occur.

"Seems as if Wickfield was never so still before," she complained aloud. "All I've seen is Lizzie Baker hanging out her dish towels, and Mr. Merry hurrying home from the post office with the paper. The children haven't had any fights, or the dogs, either! Here come an auto. I do believe it's Jimmy, and he's stopping."

She was right. Jim drew up before the door, got out, kicked a suspicious looking tire, and then came in.

(To Be Continued.)

Used Experience To Advantage

Men Who Recovered From Insanity Leads Movement To Aid the Mentally Sick

One of the leading figures at a world conference on mental hygiene recently in Washington was Clifford Beers, who was himself an asylum inmate for some time as a victim of insanity. He ultimately got better and resumed his place in society, and when success came to him—he was a graduate of the University of Yale—he devoted his time to leading a world movement in aid of the mentally sick.

A man who has suffered from a terrible illness or affliction, and who, whether he gets better of it or not, develops his time or money to the cure or prevention of that trouble in others, has found his true niche in life. None can appreciate what these things mean so much as those who have suffered, and it is probable that a great deal of the world's scientific progress arose from just such circumstances.

There is, however, one great scientific living, whose wizardly skill has not contributed to the particular affliction from which he suffers badly. Thomas Alva Edison is almost stone deaf, and has been this for many years, yet he has not produced a device to remove that condition. When asked why, he replies that he doesn't want to be bothered by little jokes. But it does seem strange that he has never paid any attention to acoustical devices.

Of course, it may be that he considers it more a matter for medicine and surgery than for the electrical laboratory.

Named After Duke

Cambridge Bay, Victoria Island, was named by Thomas Simpson in 1839, after H.R.H. Adolphus Frederick, 6th Duke of Cambridge (1774-1850), and 7th son of George III. Thomas Simpson was a cousin of Sir George Simpson, Governor of the Hudson's Bay Company. Along with an experienced H.B.C. officer, Peter Dease, he explored the Arctic Coast from Alaska eastward in the years 1836-38.

London's force of police-women is to be doubled in strength. In 1925 the number was raised from 24 to 50. Now it is to be more than 100.

The line of the equator crosses no desert.

Old Secret Revealed

Cruel Sultan's Red Rod Power Held Concealed Weapon

The Red Sultan, an Abdul-Hamid II, was known, brought down into the supposedly civilized times of the nineteenth century both the splendor and the wickedness of a despot. He won his name from the carelessness with which he sent people to a better world, for which they may or may not have been grateful.

One of his peculiarities was that he was never seen without a certain friendly sceptre in his hand. During a friendly audience he would use it as a staff, leaning his head upon the carved jade cross which formed the handle. In the midst of his throne room, and at the height of the mass-sacres which he ordered in the Near East he used it to emphasize the duties which thousands of men, women and children went to their brutal deaths.

None knew just why this symbol of his tyrannical power was always present, but recently, half a century after his death, the secret has been revealed.

Abdul-Hamid II. left his sceptre to his successor—the first time that it had passed from his hand. But fate overtook the dynasty in the form of a revolution and, with other royal jewels, the rod of power found its way into the care of antique dealers.

Recently a merchant in the Rue la Boetie, in Paris, took the sceptre from a shelf where it had long rested to show it to a customer. As he handled it he touched the jewels, and suddenly one of them gave way with a little click. He pressed harder, the sceptre opened and there was revealed a long, thin, cruelly dangerous dagger.

The Red Sultan stands revealed as a man who was afraid, who knew that in the midst of his authority he was not safe, that visitor or soldier alike might attempt his life and who carried even in his own hand the only surety upon which he might depend.

A Real War Hero

Cardinal Lucon, Of Rheims, Served His Country Loyal

The death of Cardinal Lucon, of Rheims, removes one of the most notable ecclesiastical figures of the war period. When the German guns were trained upon Rheims, when the magnificent cathedral was torn to bits by their thunder, and part of the sacred edifice was actually smashed by German shells, the Archbishop stood faithfully at his post. He would not leave, though urged to retire to a place of safety. His place, he declared, was with his flock. He protested against the shelling of the edifice, and continued to fulfill his duties throughout the various bombardments. Later, he made his protest more effective, and it was his fiery letter to the Pope condemning the inhumanities of the German deportation of French folk from northern France that drew from the Vatican the famous message of rebuke to the German Emperor.

Cardinal Lucon was made of the stuff that wins for men in other walks of life honors and fame. The example of courage he set, his calmness, his resolute determination and his abiding faith, made the Rheims Cathedral a beacon towards which Frenchmen turned their eyes in the hour of adversity. The cathedral still stands, and now its many hallowed memories are enriched by the record of a life devoted to the service of God and man, and the name of Cardinal Lucon is engraved for ever upon its scroll of "those who stood firm in their faith during a period when men's faith was sorely shaken. He was a war hero just as much as were Joffre and Foch, and he served his country just as loyally."

Authors Are Prosperous

There has never been such a time as the present for English writers who catch the public taste. Within the last twelve months one author has made more than £60,000 by a single play, and another nearly £15,000 from a single novel. And both are well on the right side of 40.

Persian Balm the creator and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating. Safeguards and beautifies the most delicately-textured skins. Cools and relieves all skins flushed or irritated by weather conditions. Magic in results. A little gentle rubbing and a youthful freshness and daintiness is instantly created. Invaluable for softening the hands and making them flawlessly white. Truly the perfect toilet requisite for the woman who cares.

Showed Canada's Efficiency

Opening Day At Antwerp Exhibition Found Building Complete To Last Detail

"Canada scored signally in the early weeks of the International Exhibition at Antwerp, and continues to lead and dominate the Fair," said E. T. Nollie, Director of Exhibits (Department of Immigration and Colonization), Canadian Pacific Railway, on his return from that exhibition, which still has six months to run. "The reason for Canada's prominence," Mr. Nollie explained, "is Canada alone of all the participating countries, had her building set up and finished, inside and out, on time. Not only that, but the whole area of the Canadian Pavilion was complete in the last detail of lawn and walks, shrubbery, hedge and flower beds. The whole ensemble, in fact, was a striking achievement which, in a singular manner, gave an impression of efficiency that was decidedly a feather in Canada's cap."

None knew just why this symbol of his tyrannical power was always present, but recently, half a century after his death, the secret has been revealed.

Abdul-Hamid II. left his sceptre to his successor—the first time that it had passed from his hand. But fate overtook the dynasty in the form of a revolution and, with other royal jewels, the rod of power found its way into the care of antique dealers.

Recently a merchant in the Rue la Boetie, in Paris, took the sceptre from a shelf where it had long rested to show it to a customer. As he handled it he touched the jewels, and suddenly one of them gave way with a little click. He pressed harder, the sceptre opened and there was revealed a long, thin, cruelly dangerous dagger.

The Red Sultan stands revealed as a man who was afraid, who knew that in the midst of his authority he was not safe, that visitor or soldier alike might attempt his life and who carried even in his own hand the only surety upon which he might depend.

Little Helps For This Week

"That ye love one another."—John xiv. 17.

Give thy heart's best treasures,
From fair Nature learn;
Give thy love, and ask not,
Wait not a return.
And the more thou spendest
From thy little store,
With a double bounty
God will give thee more.

—Adelaide Anne Procter.

The beautiful law of Christian love, and truth is, that the more we give of our own capital the more that capital increases. The widow's cause of oil and barrel of meal increased as she distributed them; and a Christian's sunshine and happiness, faith and hope, will be invigorated and multiplied in proportion as he tries to make others hopeful, trustful, and happy.—John Cumming.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle of life and succumb to weakness. This preparation gives promise of health and keeps it.

Only One Restriction
Inquiry has been made at headquarters of The World's Grain Show, Regina, as to whether or not the number of exhibitors from any one province or state is restricted.

There is no restriction whatever to the number of entries in any of the competitive classes except that an exhibitor will be allowed to make not more than one entry in any one class.

Null: "I started out on the theory that the world has an opening for me."

Void: "And you found it?"

Null: "Well rather. I'm in the hole now."

Keep FIRE at Bay with GYPROC

FIRE seldom visits houses having Gyproc Wallboard ceilings, partitions, walls and sheathing. On the contrary Gyproc has saved many homes.

This pioneer Canadian fire-safe gypsum board has a new ivory coloured finish this year that makes decoration unnecessary (when panned). It is just the thing to use for making extra rooms in the cellar or attic.

Quickly erected, inexpensive, structurally strong, Gyproc Wallboard gives permanent fire protection.

Your dealer's name is listed below. Ask him today for full information or write for interesting free book, "Building and Remodelling with Gyproc."

"The Family Clothier"

Personal and Local

Alex Muir of Alexo is visiting here this week.

G. G. Coote, M.P., addressed a public meeting on Tuesday night at Blairmore in behalf of Joseph Stobbs, Labor candidate.

A farewell social will be held in the United church on Monday, June 23 at 7:30 p.m. Members and adherents cordially invited.

Antrobus' shoe store invites you to a special display of footwear featured by Fashion Footwear, on Thursday and Friday, June 26 and 27. Remember the dates

O. E. S. Whiteside and G. Kellock attended the conference in Winnipeg between Hon. Chas. Stewart and western coal operators to discuss the details of the subvention rate on coal to Manitoba.

On Tuesday Albert Favuill caught a bull trout at Crows Nest Lake which weighed 9½ lbs. He spent nearly two hours reeling it before landing, and used an ordinary hook and line

The recital by Mr. Doxbury and son in the opera house on Tuesday evening was attended by about a hundred people. Miss Madeline Chardon played the accompaniment for Doxbury junior. The program was enjoyed.

Dr. Borden returned on Friday last from Edmonton after a month's stay in the city, on special exams. Mrs. Borden spent a few days there and returned with him.

The swings on the school grounds are out of use for the present, owing to the iron rings on which the chains were suspended having almost worn completely through. One boy had a nasty fall through one of the chains breaking. It must have been very "shoddy" material.

Little Davey McLeod was taken to the Holy Cross hospital, Calgary, last Thursday, for treatment, he having suffered a recurrence of internal trouble from which he has suffered for some time.

TENDERS FOR SCHOOL HOUSE

Sealed Tenders will be received by the Board of Trustees of Hillcrest Mines School District No. 1916 at the office of the Secretary-Treasurer up to noon of 2nd July, 1930, for the erection of a two roomed addition to present school building after Plan Number 63-C-824. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of tender should be enclosed with each tender as a guarantee that same is bona fide. The lowest or any tender will not necessarily be accepted.

STERTON MARSHALL,
Secretary-Treasurer.

P. O., Hillcrest Mines, Alberta.
Nearest station, Hillcrest. Miles distant, one.
